EDUCATION

University of California, San Diego

Bachelor of Science, Business Economics

GPA: 3.8 | Provost Honors

Relevant Coursework: Corporate Finance, Financial Accounting, Econometrics, Financial Markets, Options, Business Strategy, Intermediate Micro/Macroeconomics

La Jolla, CA

June 2026

Moorpark College

Associate in Arts for Transfer, Economics (AA-T) Dean's List (4 Terms)

Moorpark, CA

Aug 2022–May 2024

WORK EXPERIENCE

Research Associate

University of California, San Diego - Department of Economics

La Jolla, CA

Jun 2025–Present

- Selected from a competitive research assistant cohort to work independently alongside a PhD researcher studying institutional investor behavior and 401(k) revenue sharing incentives.
- Enabled extension of a CRSP and Form 5500 panel dataset beyond 2014 by rebuilding a seven step Stata empirical workflow in Python, verifying exact dataset matches across more than five million observations.
- Built a multi level plan fund panel dataset linking DOL Form 5500 filings (Schedule C and H) with CRSP mutual fund data, covering more than two million observations and 360,000 plan fund records across 828 retirement plans.
- Achieved results nearly identical to published Stata estimates by replicating logit regressions with high dimensional plan and fund fixed effects, clustered standard errors, and rare binary outcomes.
- Found that revenue sharing funds are significantly less likely to be removed from 401(k) menus in plans with revenue sharing arrangements, with a logit coefficient near negative 0.25 and p value below 0.01, robust across three specifications: no fixed effects, fund fixed effects, and plan fixed effects.

Lifeguard & Swim Instructor

Conejo Recreation and Park District

Thousand Oaks, CA

Jun 2019–Sep 2023

- Instructed and supervised swimmers of all ages; taught adaptive lessons for special needs individuals and provided free instruction to underserved youth through Safe Passage Program.

PROJECTS

Portfolio Analytics Dashboard

Independent Project

Thousand Oaks, CA

2026

- Built and deployed a live portfolio tracking tool in Python using Streamlit and Supabase, supporting real time price feeds and custom benchmark comparison across nine major indices.
- Implemented Monte Carlo simulation across 1,000 return paths and Markowitz efficient frontier optimization to model portfolio risk and return tradeoffs.
- Added Sharpe ratio and drawdown analysis, correlation heatmaps, and one click PDF report export for portfolio performance summaries.

Equity Valuation Research Project

University of California, San Diego - Rady School of Management

La Jolla, CA

May 2025

- Built DCF/EV-EBITDA valuation models with peer comps (Ford, Ferrari); forecasted financials through 2032.
- Conducted sensitivity analysis on revenue growth, cost structure, and R&D to evaluate valuation drivers.

SEC 10-K/10-Q Financial Statement Analyzer

Independent Project

Thousand Oaks, CA

2026

- Built a Flask based tool that pulls structured XBRL data directly from SEC EDGAR filings and normalizes it across companies with different reporting conventions.
- Produced clean three statement financials with computed ratios, single company and side by side comparison views, and ten year trend charts across key metrics.

ACTIVITIES

Club Water Polo Athlete, Club Tennis

University of California, San Diego

La Jolla, CA

Sept 2024–June 2026

ADDITIONAL INFORMATION

Technical Skills: Python (pandas, NumPy), Stata, R, SQL, LLM assisted workflows (Claude), Excel (financial modeling, PivotTables, VLOOKUP), Econometrics (panel regression, fixed effects, clustered SEs), large-scale financial data processing

Interests: Valuation strategy, capital markets, classical violin, watch collecting
